

ADIRONDACK
STORAGE  **BARNTM**

In 2003, we, Justin, Jeff, and Josh Puffer, established our business in the foothills of the Adirondacks. As the years go by, we brothers continue to actively evaluate and focus our business to excel in three main areas: quality building materials, superior workmanship, and outstanding customer service. With these values in mind, we choose to keep our business a viable size in order to maintain quality and efficiency.

We oversee and are directly involved in every aspect of Adirondack Storage Barns; from hand selected materials and proficient construction, to personal delivery of your building. We desire to see our Christian values reflected in every area to provide the best possible customer experience.

Family Owned. Quality Delivered. Thank you for choosing Adirondack Storage Barns!

14x40, 14x44

Delivery & Site Preparation

Site Preparation

We recommend choosing a level area which is accessible for the delivery truck and trailer. Site preparation includes bringing 4 to 6 inches of crusher run gravel and leveling it using a laser transit, to ensure a firm, level base for your structure.

Delivery

Buildings (up to 14'x44') are delivered fully assembled to your location by truck and trailer. Choose a level area. We recommend using 3/4" crusher run gravel if leveling is required.
